

Journal**Office of Legislative Counsel****Monday - 20 January 1958**

STAT

The Director's office reported that Samuel W. Crosby had called to request the DCI to appear before the Defense Subcommittee of the House Appropriations Committee. Apparently the Director mentioned this to General Goodpastor at the White House. After several attempts to fix a date, it has been left that the Committee will call the Agency again.

The Director's office advised that the DCI had called Francis Walter concerning the letter inviting the DCI to appear before the Committee. It was left that Congressman Walter would call again to try to arrange a specific time for having lunch with the Director.

Congressman Errett P. Scrivner (R., Kans.) called the DCI's office asking if we received and analyzed the magazine USSR. He made specific reference to the first issue (presumably of this year) which contained an article on Sputniks. OSI has been requested to furnish information on which to base a letter.

OSI, called and expressed an interest in proposed amendments to the National Science Foundation Act of 1950, as amended. Mr. Earl Radley, Bureau of the Budget, was contacted on request and is checking to see if these proposed amendments can be made available to us on an informal basis.
